

**Location:**  
Romanian office of  
the WABAG Group

 **Senior Process Engineer**

We welcome all those who want to make a difference with their work. In this respect, neither age, gender nor origin count, but talent, the will to perform and enjoyment of the work.

**Responsibilities and duties**

- Preparation of treatment concepts
- Process calculations (design, hydraulics etc.) according to relevant standards
- Preparation of PID's and concepts for layout and civil guide drawings
- Preparation of descriptions (plant description, control philosophy, operation manual)
- Cooperation with other disciplines (mechanical engineering, EMSR, civil engineering, erecting works, site, operations)
- Technical sales support
- Development of new processes/ applications (R&D)
- Commissioning of water / wastewater treatment plants (and Pilot Plants)

**Your qualifications**

- Completed studies in process / environmental engineering, chemistry, biotechnology or similar
- Experience in design and operation of mechanical, chemical-physical and activated sludge wastewater
- Very good knowledge of English; another foreign language is an advantage
- Very good computer skills; AutoCAD 3D Plant/ P&ID is a plus
- Independence, very good communication and team skills
- Very high willingness to travel

**We offer:**

- A multinational high-tech company which offers engineers an exciting and extremely diversified working environment
- A varied and challenging role in a multinational group and highly innovative company
- A meaningful job where talented employees in all professional fields contribute to environmental protection
- Development and further training opportunities to shape and achieve your career goals
- Team spirit and a passion for water technologies
- A sustainable, down-to-earth and well-established company with 98 years of experience
- Competitive and performance-based remuneration
