DESIGN ENGINEER - CAD

We welcome all those who want to make a difference with their work. In this respect, neither age, gender nor origin count, but talent, the will to perform and enjoyment of the work.

Responsibilities and duties:

- Design and preparation of detailed drawings and layouts for water and wastewater projects;
- Create or modify engineering drawings for water and waste water treatment plants which mainly includes:
 - Piping and instrumentation Diagrams and Process flow diagrams;
 - Hydraulic profiles;
 - General and Equipment Layout drawings;
 - Equipment installation drawings;
 - Detail drawings e.g. for steel structures;
 - Civil guide drawings;
 - Single line diagrams.
- Elaborate, extract specific lists out of the drawings and check for completeness (e.g. equipment list, valve list, instrument list, motor list, etc.);
- Electronic filling of drawings and other documents.

Your qualifications:

- Technical university degree, Hydrotechnic University can be an advantage;
- Excellent command of Romanian and English;
- Minimum of 3 years working experience in a similar position, ideally gained in an international environment;
- Competent computer literacy (AUTOCAD 3D PLANT, MS Office);
- Ability to elaborate engineering detailed drawings for water or wastewater treatment plants;
- Ability to take initiative and work independently
- Very good communication skills and team spirit

We offer:

- A multinational high-tech company which offers engineers an exciting and extremely diversified working environment;
- A varied and challenging role in a multinational group and highly innovative company;
- A meaningful job where talented employees in all professional fields contribute to environmental protection;
- Development and further training opportunities to shape and achieve your career goals;
- Team spirit and a passion for water technologies;
- A sustainable, down-to-earth and well-established company with 100 years of experience;
- Competitive and performance-based remuneration.

We design, build and operate water and wastewater treatment plants.

Share with us the fascination of international project business and join us in implementing creative and sustainable solutions.
