## MECHANICAL ENGINEER

We welcome all those who want to make a difference with their work. In this respect, neither age, gender nor origin count, but talent, the will to perform and enjoyment of the work.

### Responsibilities and duties

- Mechanical design of infrastructure related to water and waste water treatment plants.
- Management of various mechanical procurement packages.
- Preparing tender documents as a basis for construction.
- Approve the Contractors as-built drawings and O&M manual submittals.
- Prepare recommendations for claims approval or rejection.
- Preparing plant process design, hydraulic design, piping design, equipment sizing, tanks sizing, equipment list, valves list & piping MTO.
- Ability to work flexibly to apply different skills as the project progresses through the development cycle to completion.

### Your qualifications

- Completed engineering studies, e.g. Hydromechanics or equivalent.
- Minimum of 5 years working experience in a similar position, ideally gained in an international environment.
- Excellent command of English.
- Very good computer skills; AutoCAD 3D Plant/P&ID is a plus.
- Problem solver, very good communication and team skills.
- Willing to travel up to 10% of the working time.

### We offer:

- A multinational high-tech company which offers engineers an exciting and extremely diversified working environment.
- A varied and challenging role in a multinational group and highly innovative company.
- A meaningful job where talented employees in all professional fields contribute to environmental protection.
- Development and further training opportunities to shape and achieve your career goals.
- Team spirit and a passion for water technologies.
- A sustainable, down-to-earth and well-established company with 100 years of experience.
- Competitive and performance-based remuneration.

We design, build and operate water and wastewater treatment plants.

Share with us the fascination of international project business and join us in implementing creative and sustainable solutions.
